COMPLEX RECTANGULAR REPRESENTATION

Figure 2.24 from the SICP text shows the representation of a rectangular number:

![Diagram of a rectangular number representation]

**Figure 2.24**: Representation of $3 + 4i$ in rectangular form.

**Problem 1.** Write a line of Scheme code to create this object.

**Problem 2.** Unwind the series of operations that then unfolds from this constructor. Note: you don’t have to do full substitution model; only enough to show the whole series of constructors.
