Welcome To PhotoPuz!

This game will let you choose a photograph and make it into a puzzle!

Upload a file

Please select a file by clicking the 'Browse' button and press 'Upload' to start uploading your file.

All uploaded files

How many pieces would you like the puzzle to have? 4

This will be the primary teacher/adult web site where the images will be uploaded into the puzzle solver, as well as were the number of pieces will be selected. The image will have to be on your computer, not the web. The format does not matter, as the program will make all the required adjustments.

This site will have a link you can click on to go to the game and have the students play it from there, to avoid them having to see all of this background information/processes.

For the actual game interface, the students will click on the screen and the pieces will randomly snap into the correct place, and when the puzzle is complete, a sound will play. For example, on an 8 piece puzzle, after 8 clicks of the screen, the puzzle will be complete and a sound will play.
