

# 91.308 Introduction to Operating Systems

## Assignment Submit Details

### Spring 2012

- All of your submissions must include a minimum of **four** separate files:
  - **File 1:** A short **write-up** that **first** specifies what you think your **degree of success** with a project is (**from 0% to 100%**), followed by a brief discussion of your approach to the project along with a **detailed description** of any problems that you were **not** able to resolve for this project. **Failure to specifically provide this information will result in a 0 grade** on your assignment. If you do **not disclose** problems in your write-up and problems are detected when your program is tested, you will receive a grade of 0. **Make sure that you include your email address in your write-up so that the corrector can email you your grade.**
  - **File(s) 2(a, b, c, ...):** Your **complete source code**, in one or more **.c** and/or **.h** files
  - **File 3:** A **make file** to build your assignment. This file must be named **Makefile**.
  - **File 4:** A file that includes your **resulting output** run(s) from your project. This is a simple text file that shows your output, but make sure that you annotate it so that it is self descriptive and that all detailed output is well identified.
- The submit syntax issued from a shell prompt is:

```
submit csong 308hwN assignN_dir
```

where **308hwN** is the name of the assignment, and **assignN\_dir** is the name of the directory with exactly your required submission files in it for assignment number **N** (i.e. `submit csong 308hw1 assign1_dir` would be the correct submit command for assignment 1).

**Chunyao Song** ( [chunyao.song@qq.com](mailto:chunyao.song@qq.com)) is the TA and assignment corrector for this course, and she will email you your grade and any details about points you may have lost on each assignment. **It is very important to make sure that you include your email address in the write-up portion of your submission, so Chunyao can return your grade to you.**
