Assignment 3: Iterative Design for Robot Competitions

In the discussion of the paper, you should briefly summarize the paper (no more than two or three sentences), then discuss the pros and cons of the paper’s approach. You should also list at least three issues that you would like to discuss about the paper; these issues could be in the form of questions, if you’d prefer. These summaries must be original work and should include proper citations if you take any material from other sources.
