

UMass Lowell Computer Science Colloquium Announcement

Speaker: Professor James H. Moor
Dartmouth College
Date: Feb. 13, 2002
Time: 3:00pm--4:00pm
Place: Olsen 311 (The Media Lab)
Refreshments are served at 2:30pm

The Future of the Turing Test: The Next 50 Years

The well known Turing test is often criticized by both philosophers and computer scientists though for somewhat different reasons. I believe Turing's test can be defended from these objections and that it plays and will continue to play an interesting role in the future of AI. I will examine the results of an actual Turing test held at Dartmouth after the first 50 years in light of Turing's predictions.

Colloquium Coordinator: *Jie Wang*, wang@cs.uml.edu
