91.404 Announcements
(as of 20 January, 2015)

- Instructor: Assoc. Prof. Karen Daniels
  o Office: OS 216
  o Email: kdaniels@cs.uml.edu
  o Office hours: T, R: 11:00 am – 12:00.
- HW#1 will be on our class web site by 1/20.
  o Please be sure to attach signed honor statement.
- Some of our lecture slides are courtesy of Prof. Pecelli. A link to these slides is now provided on our course’s web site (via both Lectures and Related Links).
- Help with course material can be provided by Prof. Daniels and/or our TA or grader. Help is also available from the campus Learning Center. For help with math background, please consider seeking help from the Math department.
- Our TA or grader is to be determined:
  o Will grade your homework assignments.
  o Email address will be announced.
  o Office hour (if available) will be announced.
- In general, when describing an algorithm please include the following:
  o Pseudocode following the textbook’s conventions
  o Correctness justification:
    - “Mechanical” correctness (e.g. recursion base case, finite loops, staying within array bounds)
    - “As-advertised” correctness (e.g. pseudocode puts numbers into nondecreasing order so that it correctly sorts the numbers)
  o Asymptotic analysis
    - Execution time and/or storage space
- In general, we will assemble homework solutions based on the best correct solutions provided by class students. If no one obtains a correct solution, then our grader and Prof. Daniels will supply one. If you would not like any of your correct solutions to be shared with the class, please contact Prof. Daniels and we will respect your preference.
- Please keep a copy of each homework assignment that you submit.
- Students are reminded of the course policy on academic honesty. Homework should be your own work unless otherwise authorized. For homework hints, see Prof. Daniels or our grader. These hints may be shared with the class via our web site. Acknowledge in writing any hints that you have received. An honor statement must be signed and submitted with each homework assignment. An electronic copy of the honor statement is on the homework part of the course web site. Students are reminded that it is not acceptable to use web solutions in your homework. During open book tests it is not acceptable to include material from a source without referencing the source. See Prof. Daniels if you have any questions about our honor policy.
