Fall 2004 ScD Quals Schedule

Algorithms: September 11 (Saturday)
Foundations: September 12 (Sunday)
Languages: September 18 (Saturday)
Area Exam: To Be Arranged with Area Thesis Advisors

All three core exams (Algorithms, Foundations, and Languages) will take place in OS 311 from 1pm to 4pm.

Students who wish to take the quals must sign up with Prof. J. Wang (wang@cs.uml.edu) on or before **August 27, 2004**. Please indicate what parts you want to take and include your student ID.

According to the current quals policy,

- A student must pass all core exams in the maximum of three consecutive offerings of the quals.
- Once started, a student must take part in the core exams in each offering unless the student has passed all the core exams. Moreover, a student must take at least two core exams in each offering unless the student has already passed two core exams and has only one core remaining to take or re-take.
- The Area Exam can be taken whenever the student and the prospective advisor think is the right time.
- A student is allowed at most two consecutive attempts to pass each part of the quals. That is, if a student fails a part on the first attempt, the student is allowed only one more attempt to pass it in the next offering.
- If for any personal reason a student cannot take an exam that he or she has signed up for, it is the student's responsibility to provide written documentation on the reason for his or her absence for approval. Otherwise, the student will automatically receive a failing grade for the exam.
